INSTRUCTIONS FOR USE

Patient pillow - Cotton twill pillow w Hygiene cover

Safety instructions

- Read these instructions carefully and keep them for future reference.
- Do not insert sharp objects into the packaging.
- Only use the product for its intended purpose as instructed in this manual.
- Avoid damage by keeping the product away from heat sources or fire.

CE Marking

COMCO's Patient pillow is CE marked according to MDR (Medical Device Regulation) (EU) 2017/745 Medical Device Directive Class 1. With CE marking, COMCO AB ensures that the product meets the requirements of the Medical Device Act. According to these regulations, we are obliged to report accidents and incidents involving our products. We therefore ask you to report to COMCO AB if an accident or incident involving our products occurs.

Unpacking

Both pillows and covers are delivered in recyclable plastic. The pillows are rolled-packed. Before unpacking, check that the pillow/cover is not damaged. Then carefully remove the plastic. Avoid using sharp objects when opening the packaging, as this may damage the products. The products can be used immediately after unpacking.

Introduction & use

COMCO's cotton twill Patient pillow is soft, breathable and filled with siliconised ball fibre, ensuring excellent comfort. It is suitable for use in both healthcare and home environments. The product is free from flame retardants and has been tested and approved in accordance with SS 8760001.

To increase the service life and reduce the need for washing, the pillow is used together with the Hygiene Cover accessory. This durable, washable cover has good flexibility (elastic in both longitudinal and transverse directions) and does not allow moisture or body fluids through, thereby reducing the risk of skin maceration. It is equipped with a drip guard for the zip and can be wiped clean with cleaning agents and surface disinfectants.
